Early Checks Show That Total Will Be Greatest In State's History

RANSING, MICH. — Michigan farmers, home owners, industrialists and merchants, unable longer to bear the tremendous tax burden heaped upon their shoulders by tax spending governmental units, have surrendered the fight to maintain their possessions. The message of their abdication in the uneven struggle to make ends meet is written in the trailing totals of unpaid taxes being reported daily to officials.

Business Slump Proves Home Is Best Investment

Since log cabin days, politicians, statesmen and Fourth of July orators have declaimed eloquently on the American home as the foundation of our liberty and prosperity.

During the last three years state agents such as these often have been accused of home ownership inducements and worthy inducements they are. But, according to B. G. Dahlberg, president of The Celotex Company, the American Lumberman now has advanced a better, sounder argument for home ownership than the state agents' promoter investment, thus suggesting the home owner is a shrewd business man as well as a good citizen.

At the evening service the men of the church are giving the Pageant, "The Pilgrim and the Book." They will be assisted by the Northville male quartet and our own Male quartet. Next Thursday evening is again the church family night supper and the last chapter of the study class on the American Indian. The subject will be the Indian's religious life. The supper will again be a potluck. A new feature will be in the fact that this time there will be four long tables instead of the usual number of small tables. There will thus be one table for each of the four divisions of the Ladies Aid and of the new men's organization. We wonder which section will have the greatest number present.

The evening of Indian music has been postponed for one week. There will be another big penny supper Thursday night, February 16. At that time the adult choir directed by Mrs. M. J. O'Connor will present an evening of Indian music. This will be a very special program.

## THE RIGHT KIND OF AMBULANCE SERVICE IS IMPORTANT AND WORTH ITS SMALL COST

Proper ambulance service is important to the welfare of a community. Only those who are experienced in caring for the sick and injured fully appreciate the importance of proper invalid transportation.

The average person seldom has need for ambulance service. But it is comforting to know that an up-to-date car, with a responsible driver and well trained attendants, devoted exclusively to the care of the sick and injured is available at a moment's notice, at a reasonable cost that eliminates all future obligation.

We have made every effort to provide a strictly modern, fully equipped, thoroughly competent invalid service that embodies every provision for proper transportation and care of the sick and injured.

You may depend on us for safe, quick and comfortable ambulance transportation—always subject to your call, day or night. When in need of an ambulance either for urgent cases or transportation of delicate patients, you may be sure of complete satisfaction by calling—

**UNPAID TAXES**  
(Continued from Page One)

With a deficit in all of the state funds, a delinquent tax list that is mounting daily to a total that officials fear to estimate, state finances are providing no easy problem for those trying to solve it.

There are a number of new forms of taxation, but members of the legislature are wondering who will be able to pay any new taxes. Governor Comstock is proposing a sales tax. There are all kinds of schemes and plans for raising more money, but if one is to correctly read the minds of the senators and representatives, there is not much prospect of any form of new taxation right away—not until there is a decided change of heart on the part of the legislature.

One member of the legislature who started fighting for economy in days when others thought such a word was a joke, declared that he was sure the members of the legislature would not approve a single appropriation or vote a new tax of any kind until state expenses had been cut to the very limit. There is going to be no half-way work about the economy program the legislature has in mind and any bill providing new taxation will get nowhere until first there is a rock-bottom cut in state expenses, and that means every institution as well as department.

**SCHOOL OFFICIAL**  
(Continued from Page One)

ready graduated from high school has caused the public school to extend educational facilities to those, who in normal times, are working.

In the minds of many people it is questionable whether taxpayers should be asked to meet this social need, but to date no one has produced a more satisfactory or cheaper solution. At the present time it is considered a much better policy to care for in our high schools, at an expense of seventy-five to one hundred dollars per year, those boys and girls who would otherwise be economic factors in our industrial organization, rather than to refuse to consider their problem and allow them, in their idleness, to become dependent through economic worry, and some of them drift into and grasp the opportunities of crime, requiring a resultant cost in Michigan of \$490 per individual maintained in the prisons such as at Jackson, Michigan.

Considerable agitation has gone

forward throughout the state for the abolition of studies placed in the school, especially for the need of those boys and girls who are not academically minded, but are rather manually minded and require, if they are to receive training, such subjects as manual training, domestic science, art, music, etc., to be included in the school curriculum.

Statistics show that those boys and girls which the public school loses from the third or fourth grade through the eighth, because it has nothing in the school curriculum which is interesting to them, are the ones who become the criminal class and fill our prisons. A recent survey of Jackson Prison shows the following mental distribution of its inmates:

Feeble-minded	31.51%
Borderline Cases	21.97%
Dull	20.03%
Total	73.51%

Those serving time at Jackson Prison and costing us last year \$480 per inmate per year were recruited from among boys and girls who would find little or no interest in the three "R's," but many of whom would have become good citizens instead of public charges if they had been kept in school until they were placed in employment and not allowed to form habits of idleness and develop a feeling that society was an enemy which owed them a living.

In a recent survey in the state of Illinois, it was definitely established, that of the criminals who served more than one term (repeaters), the only differences between them and normal individuals in society were three:

They were: 1. Churchless. 2. Schoolless. 3. Tradeless.

With these definite facts established by investigation, and looking at the amazing costs of crime, which are placed from seven to nineteen billion dollars per year (according to what is included in the costs), it would seem unwise to do anything that would tend to increase the number of our criminal class.

It is also absolutely impossible in Michigan to maintain the school on the allotment which will be given school districts of the fifteen dollars per thousand tax limitation.

Petitions are being circulated throughout the state among the taxpayers requesting the present legislature to add to the present Primary School Fund through proceeds of a sales tax or some other means devised by the legislature in order to be able to insure parents, through an increase in the Primary School Fund, that their boys and girls will not be denied the privilege of school during this time when there is no possible chance of their entering employment.

That the fifteen dollar tax limit on real property is just and necessary in order to relieve the burden upon home owners, which had

grown to an unbearable size, is conceded by a majority of the voters in Michigan.

The same voters, many of them at least, are unwilling to see the educational advantages for the boys and girls, unable to be placed in industry, to be forced to drift into idleness, despondency, and some, into crime.

It therefore, resolves itself into not so much, "Can we afford to maintain the public school in Michigan?" but "Is it safe in this time of economic uncertainty to refuse school opportunity for boys and girls?" The question is a grave one and is facing everyone—the parent, the taxpayer, the lawmaker, and the governor.
